Regarding independent claim 41, the prior art of record neither shows nor suggest a method of forming microstructures on a substrate, comprising: providing a substrate comprising a pattern; providing a mold comprising a microstructured surface, wherein the substrate and the mold further comprise mutual interlocking features such that when the mold is placed over the substrate with the respective mutually interlocking features mated, the microstructured surface of the mold is desirably aligned with the pattern of the substrate along with the other limitations of the claim.
